RotA & small Cave
Posted by mcwulf - 2009/11/10 10:32

It's a small temple with an destroyed main entrance and a secret backstage entrance through a Cave. In the middle of the RotA temple is a pool of magic ice. The DoE Columns are sleeping Gargoyls.

The "magic ice" is way cool!

:D

Nicely done !!!

I'll add my voice to the request "How do you make the ice?"

It looks like the small acrylic "crystals" you can find in pet stores for fish tanks but I've never seen clear ones.

_____

Thank's!

Myrthe, You are right. That's acrylic 'diamonds' in two sices and a lot of colours. for europeans: i found it in 'DEPOT' - Deco shop in Germany, Austria and Switzerland. I used Aluminum foil under the crystals for more mirror-light effects.

sorry for my english ;-)

Poked around and found this link: http://www.consultantcreations.com/Diamond-Confetti-s/154.htm 2000 pc for $8. That's a good deal in my book. I also saw some at Target but not in the same quantity. Looks like this stuff can be found in a lot of places; especially places that sell wedding and bridal/baby shower supplies. Just search for acrylic diamond confetti. I may pick some up myself. Nice work!

_____

Very nice - thanks for the find!

I just wish the other colors came in various sizes like the clear ones do....
