New Pic of Cavernous River and Walls Set

Posted by admin - 2005/12/31 10:24

Here are a couple more photos of the prototypes for the "Cavernous River and Walls Set" to be released in April/May. These do not have the clear resin "water" in them yet, so that will change the look somewhat in the water sections. Enjoy!

We will have some much better photos in January so that you can see the incredible detail that Stefan has put into the new pieces.

Man O Man I can't believe it finally looks like it's going to happen! This is going to be very cool. I'm already thinking of pre-ordering two, and this may be a set that I return to often. I'm also VERY curious to see the Lake counterpart.

The stuff of gaming LEGEND being done here, guys....

L

---

its january.....?

L is right - this is something with heavy use on the gaming table - so maybe they should change the name to legendforge?

_____

Jeff are these going to use the bowtie connectors?

I sorta kinda hope so.

_____

Dungeondelver, you like the bowties? I can take them or leave them on the regular dungeon pieces, but would have much preferred if the cavern pieces did not use them.

Yeah, I like the bowtie connectors. While I'm glad the Den of Evil didn't have them (it'd have broken up the artwork, I think) I feel that the "standard" fantasy stuff works with them.

There will be no bowtie connectors for this set or the Lake Set. We could not put the sockets into the "water" areas so we left them out.
