Sci-Fi Beta Expansion Set (AND Den of Evil) Hits 3 Week Delay!

Posted by admin - 2006/01/06 19:29

We are very sorry to inform you that our Sci-Fi Beta Expansion Set will be delay approximately 3 weeks. So instead of the beginning of Feb., it should arrive at the end. We are very sorry for this, but we had to reject the entire shipment because of quality assurance reasons. We had hoped to continue hitting our target dates like we did with the Den of Evil, but the quality was just not there.

Thank you for your understanding, and we also regret that this will affect the next shipment of the Den of Evil. While the quality of that set was great, those pieces must wait on the new batch of the SF-004. They are both coming on the same container.

We will post any more updates when we receive them. Thanks.

Better to reject poor quality pieces than to ride the tsunami of gamer complaints.

cool,
then i have more time to get another set...

"always look on the brighter side of life"...

Whistles as he walks into the suset...

Jeff,

Is the pre-order special deadline going to moved back three weeks as well?
That would most likely make the interest in pre-orders increase.

_____

Just got the News Letter... :)

The pre-ordered sets should start rolling out late next week. The stuff is on a rail car somewhere between Atlanta and Knoxville right now. I would give the exact location but I would be afraid that some of you might organize a little posse!
Giggle...

So mental note if i want to order a another Alpha and Beta might want to do that now...
