_____

Not sure if this has been mentioned before, but how many others thing a lava lake and lava river set for caverns would be really cool?

_____

The idea has been bandied about, with much enthusiasm. Note that someone has already come up with a compatible set (which looks pretty darned good).

Still, there's no reason not to bring it up again, especially if you have a new take on the idea.

I find the "Search" tool at the top of the page is great for looking to see if something has been brought up before. (Searching for "lava" on all forums brings up five pages of threads in which the word "lava" has been used in any context.) You can resurrect an old thread that you like, or decide that nothing has been done recently enough and start a new thread.

The thing that gets me about every lava set I've seen is that there always seems to be a lip around the edges of the lava, which just kills the aesthetic for me.
