DF Confessional…:lol:

I got the Grendel doors to work with DF by sacrificing a half dozen wall sections to accommodate the width of the doors. I cut away the openings with a scroll saw and chipped out the remains with a small wood chisel.

I keep saying, dungeon accessories are the way to go!

This is stunning! Fabulous paint job and the setup is great. I have been looking at it for 20 min and I can't decide what my favorite part is. It is all just terrific!

There is a reason so many of us here call you the Dwarven Forge Master IO.
Once again, a most excellent layout and some real creativity & imagination!

It was really cool to see some of the Armorcast terrain items in settings that were really cool.
Plus, they were used in an imaginative fashion I am sure Tim never dreamed of when he was selling them.

Plus, your confessionals IO are just too much.
The whole chapel with a mix of all the companies' items was really nicely done.

The man-eater pod room was a really great trap.
I just wonder why the giant spider has not become a snack yet?

Again IO, a great set-up!
Keep 'em coming!

RF*:

He keeps DOING that stuff! It makes me do strange things, like, oh, I dunno, make custom pieces?

IO Mike:

In-FREAKIN'-credible! Man, you're always challenging me to build stuff - and you never SAY anything, just keep making cool pieces. Remember the risers?

What can I say; you build GREAT accessories. Keep it up.

See ya!

Jim

I love that shot with the temple altar and the glowing sun/orb in the background. And that glow-in-the-dark pentacle is just awesome.
