Den of Evil Wicked Addition Set almost gone?

_____

Well I bought some DoE WA today and I saw that it had less then 50 on the drop bar. Does this mean that it is almost out for good?
Glad I talked the girlfriend into allowing me to get 4 sets before they go, if this is the case. Now I'm afraid what I might have to compromise on(shoes, jewelry, purses oh my).

_____

It would be nice to know how many Den of Evil sets are left to be made out of the 1500.

I have 4 sets coming myself. I'll see what the cards say when I get them.
Maybe Jeff will respond with a close guess as to how many are left for people who are on the bubble on getting them.

This is a TOTAL guess, so.....

I think they order them in batches of 500. I seem to remember the DOE WA being reordered once? If so, that would mean when this latest batch is gone we get one more batch of 500 coming.

Again - total guess on my part.

Harneloot, I hope you're right! I caught on to DF when DoE was already out, so I've missed out on the R&P set already. I was going to skip DoE altogether since I couldnt get a complete set without paying extra to get it on ebay, but the sets are just too damned cool to miss. I've been really good this year, so hopefully Santa noticed and will reward this geek...
