Sweet. Did I see you added a small battery or something to the back to provide an actual light source? How about a flickering lamp?

JKW

---

hi, Weaverjk
This is a flickering lamp!

Where can I get those circuits ? I would need that kind of light for another project.

_____

yansolo,

How many wall sections per price, and how many are available? I AM interested, if the price is somewhere I can afford this close to Christmas!

Thanks, and See ya!

Jim

_____

Hmmmm
Not to steal yansolo's thunder... not that I could, those lamps are neat-o... and I would consider buying some.
In fact...
Perhaps Jeff and Stefan should look at a ELECTRONIC room set.....
Probably limited edition, it would be pretty expensive methinks....
I'm starting a new thread on this..... Don't want to hijack this one...

Like I said, those things are really neat yansolo... great job!

_____

Thanks for the appreciations.

I don't have (take) the time actually, but i will post my work and how it was realised on
tom's french forum, it'll be better for my english ;)!
