Clarification on Add on Packs and what comes Free

Posted by cybrsage - 2013/04/15 13:58

I am a little confused - which surprises no one, especially my wife. :)

We went with the 5 set pack and have happily seen more and more items be added to it as the funding increased. I am a bit confused about the curved and angled pieces.

Do we get some with the original funding or do we have to buy them as an add on item in order to get them? In other words, do I get 10 of each (with the ability to add on more if I desire) or none but can buy them at the great pricing offered now if I want them?

Thanks!

OOPS! I posted this in the wrong forum, sorry folks!

EDIT: Although if you know the answer, feel free to post it here. ;)

You get 2 free of each and their corresponding half floors per set you are pledged for as long as you pledged for at least two sets. The payable add on packs give you even more of those pieces if you want or feel you need them. Hope that helps!

cybrsage,

Each set you buy (two and more) qualifies you to obtain freebies, including a few diagonal and curved walls (nice explanatory image). For now, you obtain 2 diagonal walls per Set (10 for you since you are buying 5) and 2 curved corner wall per set (10 for you since you are buying 5). Furthermore, you are

also allowed to overpledge more money to obtain even more Curved Corner Packs and/or Diagonal Wall Packs. So, if you want more curved corner and/or diagonal walls, click "manage your pledge" at the top right of the KS page and manually increase the amount of money you want to commit (including possible international shipping fees). At the end of the KS, DF will contact you to know your shipping address and to know toward which product your overpledged money should go to. Finally, any "combos" for add-ons are possible, with any present or future add-ons. This means that you can buy 1 diagonal wall pack and 1 curved corner pack for $70 (unpainted) or $95 (painted).

_____

Thanks! That does clear it up nicely.
