

## Great accessories to use with the Cavernous River Rivers & Lakes sets.

Posted by Wereweasel - 2006/03/04 02:21

---

I have found some AMAZING pieces - made of resin, that fit great with DF and 25-30 scale minis.

They are actually AQUARIUM ORNAMENTS made by: Water Works of California. The specific items are: Med Castle w Lookout and a similarly-styled, unnamed tower piece.

They measure 20.5cm and 19cm in height respectively, (8" & 7.25" for our US friends). Please note that I got these on sale/clearance here: (2 of each, 4 total, for under \$45 Cdn/\$38 US TOTAL).

I would suggest anyone interested in getting the upcoming DF River and Lake sets to look into these if you can.

Good Hunting!

I love Aquarium plants and ornaments as scenery elements, for me some of them are very "Alien" looking helping to make sci-fi outdoors look like it is on another world...

While i know a number of gamers use the actual ceramic models, or resin or what not haven't made the plunge yet, but yeah will have to keep an eye out for them

Seriously, guys . . . when the cavern river set hits, be prepared for an ONSLAUGHT of pics from me.

I don't have TOO much in the way of non-DF scenery here -- a few aquarium plants, that's about it. But I have tons of great water-associated minis (including the new alligator man from the latest set of repainted official D&D minis) and they really need a home....

fyi

I just found two more aquaruim items at the local Pe^tsmart that will be great for creating tall and long chasms.

The first is an AWESOME, (approx 15" long, 5 1/2" tall) 3-Arch bridge. It is available on their website and was a great deal. In fact, this item was so nice I actually picked up two of them. Soon I will be making suitable pillars to (optionally) convert these into very tall, and or multi-level bridges. In fact the stonework is so like DF in appearance (especially at the bottom where even the colours match almost perfectly) I will merely be connecting various DF pieces together (for stability) to make the needed extension pillars.

IMHO this bridge is a must-see piece for anyone wanting a similar style of bridge!

Edit: Link has been recently provided (in my following post) for the bridge mentioned above.

At the same store I also picked up another item (actually 6 of them) called a Hollow Wood Ramp and it is a repti;le accessory. Although it will require a slight paint/colour re-adjustment (to create a stone-like) appearance, I expect the conversion to be quite convincing. It also stacks quite well and "fits in" as follows, it measures 4 Cavern pieces, (16") wide. It is also 3 3/4" tall, (this equals 2 Cavern pieces high if placed upon a Cavern floor. I expect these pieces to fill many of the empty vertical spaces between various cavern levels when finished.

Barring links, do you have the name of the piece (from the box) and the manufacturer? That makes it much easier to find or order something from our local retailer.

Thanks!

Here is the website/link for the bridge.

[http://www.petsmart.com/global/search/search\\_results.jsp](http://www.petsmart.com/global/search/search_results.jsp)

Just search for: bridge and it's the only result that will appear.

As for the "Hollow Wood Ramps", the label/ticket says "All Living Things". I have not managed to locate them on the website myself, but have found them in two of their store/retail locations and there was nothing to indicate that they are discontinued items.

Hope this info helps.

Here is the correct link for a "bridge search" at Petsmart:

<http://www.petsmart.com/search/index.jsp?kwCatId=&kw=bridge&origkw=bridge&sr=1>
