Cavernous accessories set?

Posted by David Wasilewski - 2009/10/31 07:43

_____

I would like to suggest another accessories set - one for the caverns range?
My guess is that the dungeon and the MBS accessory sets have sold really well so it wouldn't be too much of a gamble to try the same with a Cavern Accessory set?

It would also be a way of suckering in others to the caverns addiction (Mwa ha haa)

Contents might include:

Alternative rock formations
Alternative 'plonk down' wall shapes (including a small wall)
Alternative stalagtites
A floor piece with a 2 by 2 sink hole in it with a resin "pond" that can be placed in it to make a rock pool for versatility?
Piles of rubble (a couple of variants)
Crystal formations (one and two and even a two by two sized piece?)
Fungus vegetation (small, medium and large versions?)
A much larger "cavern steps" piece - something similar to the RoTA?
Another "platform" piece but one that is only one square high rather than going up to the ceiling?
Narrow cavern passage ways piece with a transition piece?

Just trying to keep everyone's creative juices flowing.... :)
What does the community think - would you buy something like this?

Dave

Dave,

I would buy that in a second.

Although I would also like to see...

a single river grate (straight cavern) wall piece, (that could be used for a subterranean cage as well).

a single (covered) lair piece, (presumably a curved cavern corner piece).

a single hive-like or egg hatchery piece, (again in a cavern corner piece).

oh, and a single (exterior angled?) cavernous wall, (technically I am asking for a straight wall type piece, although one the juts-out significantly into the cave -in the middle).

and finally, a piece that juts-out into the cavern from only one corner as well. Those could be used in so many areas.

Those last two would really really change the look and potential configurations of caverns IMHO.

You wouldn't need more than one of any of them to add the requisite variety, although having 2-3 of each could also be just as useful IMHO.

Steve
