Can you give me some specific links to posts with missing pics? I think my status as an Admin is affecting my views.

Nothing should be lost.

Thanks.

Okay...

I THINK we have it fixed. All photos should be up now. It was a problem with posters using non-Linux files names so if it had a special character in the file name, it was ignored.

Let me know if you still see some missing.

Thanks a bunch for your help!

Jeff
