## Medieval Furniture & Accessories

Posted by jackattack - 2006/08/02 09:15

Now that we have another absolutely beautiful setting to play with, we need to furnish it. Please share your favorite furniture and accessory sets with us -- be sure to say who makes it, and provide a link if you can.

Fenryll makes some really great stuff, but they've managed to destroy their own website -- a few weeks ago, you could find just about anything you wanted, even if you had to use the French version of the site, but now they appear to have merged with an online gaming magazine and I can't make heads or tails of it. However, you can at least find a complete catalog of their goods (and several other companies') at http://www.gamers-quest.co.uk/acatalog/Miniature.html

In the Fenryll line, they have:

Medieval Inn (walls and accessories) -- pricy, and comes with walls and floor we don't need, but a nice assortment of goodies including fireplace

Inn Accessories -- good for any building or home, really

Inn Accessories II -- lots of shelves and bottles, for those who aren't queasy about modding their DF stuff Medieval Bedroom -- bureau, nightstands, and a bed with a sleeping guy

Medieval House Accessories -- table with benches, chest with drawers, and a nice stove/oven Medieval Shop Accessories -- three counters with goods (lots of fabrics), and a couple of other generic items

Blacksmith Accessories -- anvil, stone work surface, table with finished goods, bucket, shovel, and a couple of other items

Wizard House Accessories -- desk, bookstand, astronomy device, and what looks to me like a daybed Wizard House Library -- big shelf unit with lots of books and other stuff

Mega Miniatures is a nice line. They don't photograph well, apparently, because I've seen them unpainted in stores and they look great, but the online pictures of them painted are not great. (Maybe it's just that paintjob.) Anyway, they make:

Fireplace Set -- fireplace with hanging pot, pot on bench, woodpile, three-legged stool Blacksmiths Shop -- anvil, forge, bellows forge, blade mold, work table, cooling bucket (kinda weird-looking)

Bookshelves x2 -- two bookshelves, with an assortment of things on them

Witches Workshop -- still, cauldron, and pentagram

Barbarian Throne -- with candelabras

Elven Throne -- with decorative trees

Astronomy Equipment -- globe (paint your own world!), telescope, sextant

Tables & Chairs -- two tables with food, eight chairs

Beds x4 -- four beds in two styles

Abbey Furniture -- high back chair, high back bench, book stand, writing stand

I know I've seen a diorama of a banquet online before, with terrific miniatures and tables loaded with food, but I can't find the thing.

Anybody else got references for good furniture and accessories?
