Whose is the DF of Terrain?

Posted by monkplayer - 2011/08/16 17:39

Some of you have mentioned to me that TerranScapes has excellent terrain. I've just finished looking at their product pics again, but also their vids for the first time. I must say I don't know of a better company whi has more detailed terrain. I wish DF made terrain :(.
MY question is; Is TerranScapes the DF of terrain? Is there anyone that makes more detailed terrain than TerranScapes? They are pretty pricy for their terrain? Does it last?

I have wanted some of Terranscapes terrain for a LONG time. The problem is, he has really exploded with popularity and it is nearly impossible to get a slot to get something made. He doesn't just have a big warehouse full of finished products so you can just fill up your shopping cart and place the order, it is a guy in his basement and he has to make it as you order. I do hope that he expands one day!

Until then, the best terrain I own comes from two places. For buildings and accessories, I use Miniature Building Authority. For trees, rocks, hills, various buildings and scenery...I go with Eslo Terrain. You are really not going to find any better quality terrain. It is pretttty pricey, but it is durable, will last, and just looks amazing.
