How very cool! I didn't know that the picture was based off of a real location! I used to love reading that section of the DMG and would stare at the picture imagining being in that very street with my character!

Where is this taken?

The Street of Knights, in Rhodes. Cool name for that street, eh?

Google Emirikol the Chaotic and look at the picture. It is one of the well known illustrations from the Advanced DnD DM Guide from 79 (or was it 78?). If you cut your teeth on ADnD then you would get it. You may have started with Dungeons and Dragons circa '74 (ODnD some now call it)? I played that too but the Holmes Box Set version (my first rpg). I never knew those were two totally different systems, the "Advanced" bit of ADnD threw me off. So, thinking it was supposed to be a beginner version, I abandoned the Holmes box and spent many many hours pondering the arcane mystery that is the DMG. Quite possibly the most brilliant yet bizarrely organized tome I own.
