This is a list of all the types of sets I would like to see made.
1. Sewer Honestly I would be good with just a fantasy floor set that made a sewer set up possible. If it was a full blown set some walls with pipes coming out of them and maybe red bricks for the walls and floors.
2. Arabic palace MBS Arched doorways and windows, mosaic floors
3. Arabic slum MBS stucco walls hard packed dirt floors
4. Oriental palace MBS Curse of the golden flower esque design
5. Ice cave (Is this still being developed?) Translucent cavern set
I would love to hear what everybody else had on their wishlist or ideas for what these sets should include.

Shadbelly,
Nice list, indeed.

My wish list would be:
1. Sewer floors and walls.
2. Ice Caves...not all pieces have to be frozen floors/walls but definitely within the theme. Also, some transition pieces from regular cave would be nice -- similar to DoE HellScape.
3. Unique Floors, Walls, and Passageways -- similar to the Cavernous Chasm, Cavernous River & Walls, and Realm of the Ancients Sets.

Stefan was working on a Winter set, at least there were a couple preview pics. As for sewers, standard room walls coupled with the open water tiles can accomplish the look. IO did some. I would like to see a new floor set though.

The Ice cave is really pretty much the Cavern Set after it has been frozen over....either by the coming of winter or by the habitation of some very cold creature or entity....

_____

I would prefer Sewers, Catacombs and buildings (Roof, Castle walls, towers etc...)

==========

_____

Sounds cool Stefan ;-)

I'd like to see 6" DoE straight hallway, another Fantasy Floor set and maybe a new Fantasy Walls set with different corner sections and short wall pieces with interesting stuff on them. (debris, sekeleton, mouted head, statuary, coat of arms, alchemists corner etc)

_____

A wizards room and armory set with all the trimmings!

I echo Crioux's request for Catacombs!

_____

Catacombs and a modular castle set would be awesome.

==========

Re:Wishlist

_____

A new MBS style of building e.g. a fantasy gothic mansion style of building with carpeted floors, wood panneling on the walls.

More accessories, preferably in 'themed' sets and in bigger sets than are currently the case.

Cavernous WA Set - free standing pieces like more stalactites and rock formations and free standing walls variants, piles of skulls/bones/debris, a floor piece that has lots of water pools in it but still compatable with the pre existing floor pieces.

Dave

_____

In no particular order:

1: Sewer set.

2: Tower set or something to help build castles

3: Den of Evil WE2 even if just a run of 500 sets.

4: Add on to MBS(I think they are doing a stable so that might be enough)

5: Cavern WE as mentioned in above post
