DEN OF EVIL
Posted by jls304 - 2011/11/16 12:48

Does anyone have any pictures of a large Den of Evil setup? I'm getting ready to build a large one but I'm looking for ideas. Since there are only three sets it's kind of hard to get super tricky with the builds. I guess I am just
looking for interesting suggestions and alternate ways to use pieces that I havent thought of. Some of it comes down to what you combine with it I guess.

I once used DOE and MBS floors to make a creepy church. It goes well with
the cavern or lava sets too but I'm looking to mainly use DOE only.

It's rare to see large DOE pictures here.

Right now I have:

2 Room & Passage
4 Room
3 WE (want 1 more)

Check out the DOE pics in the contest section of the forum if you haven't already.

Yep it's the better way.
I have the 3 sets + a additional room & passage set a french fan sold me 2 years ago at a incredible price.
It allows me to make some interesting set up on a maximum of 2m².

I almost never go into the Contest section of the Forum but there were some cool ideas in there. I got a few idea good ideas from there and will probably start working on a setup. This is my favorite Limited set and I just don't use it as often as I should.

Thanks for the suggestions.
