Ice Cavern Monsters

I don't have the gaming experience most of you here have. I was thinking about what monsters/NPCs would fit in with the ice cavern. More specifically, ones with available miniatures. This list probably could exclude easily interchangeable monsters such as the undead.

If anyone has stuff to add, it would help. Here are some I've found so far (thanks to the search terms "ice", "winter", and "frost", I'm so original)

Admittedly, most of these aren't to my taste, hopefully other members have better ideas. Perhaps in some cases its just about the color you paint the figure.

Winter Wolf - http://www.reapermini.com/OnlineStore/winter/sku-down/65091

I think the veteran D&Ders may have better ideas for this one.

_____

Skeletons, lots of them. They are immune to cold effects.
So, any kind of skeletal undead work well in a cold based scenario.

_____

Remorhaz - D&D Miniature
The whole GW ogres line (including their kind of mammoth)
Dwarves (of course), maybe evil ones like duergar
Frostmen (all of which have an eye-patch they can remove to fire some kind of ice bolt twice per day)
Warriors of Dunland (GW Lord of the Rings range)
Ice and crystal elementals

That's all I came up with for now.
