HM ? Hack-Master?
What is that anyway I've been seeing their stuff. I thought it was a parady at first. :oops:

HackMaster is a WotC-licensed "parody" of 1e/2e AD&D which "humorously" "sends up" classic modules, campaigns and rules.

"Oh look, a complex rule! Why, this is just ripe for skewering!"
The only folks laughing are Kenzer and Company, all the way to the bank

I'll definitely be at DragonCon. If anybody wants to get a pick-up game going, I'd be up for it! If we each bring a couple of sets of DF we can have a nice big setup to play in! :twisted:

Not true.
There are four sanctioned groups in the Chattanooga area (three running out of the local game store) with about 20 players total. Everyone enjoys the game and it is the #1 selling RPG at the store.
The game is 1e with elements of 2e added in and some new rule mechanics including a percentile based skill system, rules for honor, new races, etc.
There are humorous elements added in and name dropping references to the KoDT material but they don't really affect the game and can be dropped or renamed. The rules are as complex as you want them to be and elements are easily ignored allowing the game to be fully playable.
If more people would try it instead of summarily dismissing it as a "joke", I think they would be surprised at the what a good game it can be.

I've went from sad to happy all in the course of two sentences...;)

Hopefully the local shop will get some of the sci-fi terrain in for display/play purposes. I'm dying to see it up close.

Will anyone be running any games at Dragon\*Con using their own personal stuff? I'd love to drop by and see some cool layouts.

As far as I'm concerned, if you guys all rent a one room apartment and steal yesterday's paper to make with the cool dungeons, then do it!:)
