_____

This section is for the posting of sample maps that use Dwarven Forge pieces. Please post JPEGS of the map and a listing of all the pieces (or sets) it took to construct. For security reasons, we can only post image files at this time. We may allow Tile System files in the near future. Stay tuned.

Jeff -

Thanks! This is exactly what I was suggesting when I made that post.
But I'm surprised you can't handle PDFs; they are actually much easier than JPGs, although I suppose security issues might disrupt that.
Hey, I'M just glad you were able to set up the section!

Thanks again, and SEE YA!

Jim

It looks like my brother Doug is going to make this happen and allow pdfs and TS files to be posted here. It should take about a week or so -- so get your maps ready!

_____

Thank you, this will be a nice outlet. We'll keep set up photos in the photos area, and actual map setups with inventory (how many sets/pieces etc) here. Very nice!

_____

Doug!

THANKS for the PDFs; they are a LOT easier to print, and (I think) smaller than decent jpg's to boot. And the inventory list will stick with it as well, as a 'page 2' or whatever.

See ya!

Jim
