DOE Expansion Set

I did a short video and some pictures on the new DOE Expansion Set and also included the DOE Room and Passage Set. I stocked this den full of demons from the 1st edition Monster Manual. The only demons I didn't have was Juiblex and the Manes.

Nice set-up and I love the demon theme. One question that's been nagging at me- I know he's a demon

lord and all, but how does a Gargantuan Orcus get through such a tiny doorway? Kinda reminds me of Zoolander- "How will the children fit into such a tiny school?!?"

Thanks, granpappy. To answer your question, I believe they built the Den of Evil around Orcus. That way, he wouldn't have to look undignified squeezing through a tiny doorway.

Ah, the ingenuity of demons! Though now I have a really funny image of Orcus trying to work his way through a 10 foot wide doorway, lol.
