I would love to find something similar to this. Unfortunately those guys closed up shop earlier this month and I can't find any rivers anywhere. Anyone know of a good place for river pieces?

Eric

I've bought some stuff from here before:

TerranScapes

The store is closed for now, but the products are worth the wait!

Yes - I am familiar with them - I have them bookmarked. Their stuff looks amazing, but I would be happy with something a little less expensive.

I hope this isn't the same set pictured. I don't do outdoor terrain myself, so I don't recognize the brand by the photo.

Hotzmatz also does a system of airbrushed felt rivers.

Hope either of these help...

_____

Gale Force Nine have prepainted rivers but it looks like they are made for 15mm scale/Flames of War.

_____

Biowizard and jackattack - both of those are exactly the kind of thing I was looking for. Inexpensive, but not too cheap looking. At that price I can snag them both and see which I like better!

Thanks to everyone for the suggestions.

Eric
