Hellscape 2 Pre-orders
Posted by jgardner44 - 2012/11/03 05:33

I'm saving up to get several sets of hellscape #2 when it is released. Is there any estimate about which month we may see pre-orders occuring for this set. I just want to make sure I have funds available. Thanks!

That's awesome to hear! When will we start to see pictures or info on this? Early part of 2013, would that be in the first quarter?

Monkplayer is holed up in his closet mumbling "gotta have HELLSCAPE, gotta have HELLSCAPE!" The Hellscape and of course Cavern Sets are my favorite sets! I LOVE pulling them out and showing them to someone who has never seen DF. It's like watching a 5-year-old kid entering a candy store!

If you are concerned about having funds for DF when a new item is released or restocked, does it make sense to buy DF gift certificates?

And how do gift certificates impact DF's financing? Does it help to get funds up front to pay for new

shipments?

_____

Stefan,

Thank you for the reply. I hope the pre-orders will be open about the time tax returns come in. Then I can make a much larger order ;) hint hint.

_____

And just to preempt questions from my European customers - yes - we will get Hellscape 2 here in Europe as well.

I've seen already early photos of the individual pieces and I'm sure you will all love what Stefan and Co have come up with.

Way too much Hellscape 2 talk without any new pictures.
Indeed! ;)
I do remember seeing this one almost a year ago:

http://www.dwarvenforge.com/images/fbfiles/images/Fire_and_ice_forum_1.jpg

While this looks pretty awesome already it would be really nice to see a little more. :)

_____

I love the look of the hellscape caverns leading into the standard caverns and then finally the ice caverns in this photo. Wonderful image!

I hope we see hellscape 2 and ice caverns 2 next year. Those are my two favorites! :)

_____

Hi Stefan,

Considering i'm not a fan of Hellscape, i was wondering if there is a set planed between catacombs and Hellscape2?

Thanks

Pat

Really great and I like it a lot! Looks like 4 new pieces in the picture, Statue, end piece, stairs and the tall impressive piece.

Is there a new passage piece from caverns to hellscape in the picture? It would be really useful.

I just have to say that I love the "taller" elements to the new sets coming out. The stacking walls in the catacomb set and the tall set pieces in the hellscape 2 photos are making my day. Thanks DF!

_____

That Hellscape 2 piece looks really cool. What I'm most keeping my fingers crossed for is pieces similar to cavernous rivers and lakes but with lava, to allow us to create a lava river or lava pool/lake in a cavern. Don't need as many varieties or options as the cavernous rivers and lakes, but a lava lake edge piece and an all lava floor piece would make my day.

_____

I'm hoping for entire hellscape sets for lava rivers and lava lakes in the future. Those two are so important for the builds that I want that they would need entire sets to have the variety of pieces we need. Of course I'd love to have a large central volcano piece that was triple the standard wall height tall that had streams of lava feeding the lakes and river. Imagine if there was a winding path up the volcano and a "sacrificial" ledge at the top where you could throw virgins in ;). I'd pay lots for a central piece like that as a DF addition to a future lava lakes and river hellscape sets. Of course I'd love the flexibility to build lava "waterfalls" coming down stack able walls as well.
