The Farm *updated pics at the end*
Posted by jericho - 2012/11/07 19:56

_____

I am always in need of a farm so I put something together. I made the house using Hirst molds, wood, joint compound, and hobby sticks. The fences are made from hobby sticks. The barn was made with Dwarven Forge. The sod roof for the barn was made with matte board, hobby sticks, ballast, and flock. I will flesh this out more for a game I have in a few weeks where the players explore the Graul Farm. There will be a basement level off table.

Looks good. I like how you used the DF pieces to make a stone barn. Great idea.

Great job! I really like the sod roof on the barn. And making it double height really makes it look realistic. Methinks I will steal that idea.

Thanks Acarius! I am happy with the sod roof considering that it cost next to nothing to make. At first I tried a single height for the barn but it looked to shallow so I made it taller.

I will have some pics up of the interiors tonight probably.
