Temple!
Posted by crioux - 2007/01/29 08:23

_____

Basically, when we venture into a temple or a castle, the usual stone walls are too rough, not "nice" enough with no decorations.
A cleaner, square bricks version of the basic modules would be needed, with accessories like Throne, altar, tapestry etc..

_____

Sure there is DOE set, but I don't have it, and we might need a Temple of good, or King's Castle, soa cleaner version might be needed.

But there are so much other projects that might see the day before this one (tower, cityscape, etc..), I don't put too much hope in it.
