CATACOMBS UPDATE! The Catacombs Sets are in the warehouse and we are fulfilling all the pre-orders now. All the pre-orders should be sent out on Jan. 2nd, and when they do you will get an email with tracking information from UPS (called "Quantumview").

Thank you all very much for your support and patience with the late shipment of the Catacombs Set pre-orders.

We will have a short supply of Catacombs Set available for sale starting Jan. 2nd. At that time we will have some re-stocks available as well -- including the Room Set as well as the Room and Passage Set.

Our warehouse is moving locations during the first two weeks of January, so any orders place between Jan. 2-17th will be not be shipped until after Jan. 18th.

You can do it now...and if you order by noon on Friday (1/5) we will ship them out immediately. After that date and until 1/18, nothing will ship out until 1/19 as the warehouse is moving.

Thanks.

Jeff

Yay! Got the notification that mine is in the mail!

One little issue: UPS says it weighs 8 lbs, which seems about right for one set... except that I'd ordered some other items along with the Catacombs preorder. Maybe those things are caught up with the warehouse move and will ship separately? No problem if that's the case BTW. Or am I just over thinking this, and everything is really in the box?

Good and exciting news regardless!

Just an update for European customers

As of yesterday all (*) was packed up and should go out for delivery today. That is actually faster as I hoped.

Not sure you get automatically tracking information?

(*) All means all fully paid for sets. I'm aware of 2 customers who need to get invoices separately - will be done today. I also will check customers who took the £5 PRE-OrdER option but didn't order after November. Your sets are save and will be kept for you.

That was crazy fast shipping! Got my Catacombs sets today and they are amazing! I've inspected one set so far and no issues. I like how they each have their own box with custom-cut Styrofoam and baggies for every piece.

The flickering torches are awesome!!!

Welcome Frog! I am guessing this is your first set based on how you reacted to the packaging and baggies. Just so you know every set comes like that! Welcome to the addiction.

Indeed, the ice caverns are great....and then, of course, one needs fire to oppose ice....

:)

Welcome to the boards!

Just wanted to say great thanks to Thod and all the team. Proud owner of my first Catacombs set. Along with a number of other sets that I have had on order for some months. Well worth the wait :)

Once I have gotten used to them all - will add some more video reviews on my little YouTube channel.

I did not receive my shipping notice for my pre order but it arrived on the 15th of January, I'm in Canada. Everything is most excellent and I used it for part of our current D&D Next Campaign Isle of Dread....I just had the party fall into a buried ruined temple as the ground beneath their feet gave way. Although my Wicket Additions set I ordered was not there, not sure why.

Hope that helps.

Im in Canada too, so one of my guess was that it was delay by the customs. But since you got yours 10 days ago, it might be something else.

Thanks for the info Falkbert.
