GRRR Posted by blairgb - 2007/03/31 02:03 You can make a convincing sewer system using Dwarveb Forge cavenous rivers with the standard fieldstone dungeon pieces. I just think of the stalagmites, formations etc. as nitre, fungi and filth that's accumulated from drips in the ceiling. No sewer 3d tiles, anywhere! GRRR Posted by Ghenghis Ska - 2007/03/31 03:02

Er. i know Ainsty made some, and when Old Crow bought Old Crow Ainsty they are still in the product list, do a search for The Sewers of Aldwark or Old Crow Models, or Anisty should bring them. Not sure if you ahve seen them and consider them not good, or you haven't seen them.
