Why would a Dwarven Mine not count as "gaming talk" you ask?

Because it's Lego!

I can't believe this, but Lego is making... a Dwarven Forge!

Check out the pic here:

It's a bit small and not hi-res, this is a leaked photo of an upcoming set. I have no idea what the details are, but knowing Lego, this is going to be one set in a new "theme," which means probably at least 3 or 4 other sets in a similar vein. I doubt if many DF fans are into Lego, but those of you with kids.. well, if you can't beat 'em, join 'em!

I thought it was a pretty cute development...

I was very into Legos when I was younger, and have even picked up several of the Star Wars sets in recent years (about half to two-thirds of them). The mini-figs are what we used in our SW RPG before the minis from WotC came out. :)

But trying to keep up with Legos + DF + minis + ... something just had to give :(

I love Legos, SW and otherwise (been to LegoLand), and huhm... may have to keep a look out on these for some of the "accessories".... they are close to scale, yeah that's why i buy them, sure...
