For some time now i have been wanting to make a Map for use with the Star Wars Minis game in DF. I have a few ideas as to maps i wanted to try, and so far have two that i am working on, presented in the first post is the first of the two maps i am working on.

I am putting up the two versions i came up with in the hopes of maybe getting some feedback as to which people like better.

A little info.

This one is based off of the "Death Star" The left of the map is the detention blocks, the far right is the Hanger the Falcon was in, and various other features, turbo lift, a few control centers, and the trash compactor(next to the Cells).

I was going to run a little scenerio with it which i am still working on...

map width = 64.0

map height = 40.0
