Guslandt,

Sounds like the illness is well on it's way.

Guys;

I'm scared to inventory my stuff; sometimes it seems to grow overnight, like either a fungus, or Topsy (remember Topsy?).

BUT, then I read the newsletters like the one Jeff just posted, and I know why the collection keeps getting bigger!

And then yansolo and Thod come out with THEIR custom stuff, and it multiplies AGAIN!

And if I start doing my N-scale railroad dwarven-mine crossover project, I'm REALLY going to be in trouble!

Oh, NO!

help me, help meeeeeeeeeeeee.....

(tiny voice fades into silence)

Jim

Yes - I've also been thinking about combining some N-scale rails with some sculpting / scratch building to create some mines. And for once create some free of HA or other strings - which would allow me a lot more freedom to do what I like with the molds and the products once I've done them.

Wasn't this what you asked for when you asked for help.

Or did I misunderstand you once again (sorry - can't find the smilie for the evil grin at the moment)

Thod

Thod,

We-I-I-I, actually, more along the lines of "help this poor fool, before he branches off into MORE modeling projects!" but helping me figure out how to make kato unitrack into flexible track to fit into DF pieces will probably be a better idea. And for that matter, I still have to figure out WHAT scale or gauge of track to use in the DF tunnels/passages as mine drifts, etc.

I've got a LOT of research to do before I try THIS one on, and since Sandy and I have a kitbash/scratchbuild of a brig-rigged Schooner - in styrene - to do FIRST, this one is very much a 'back-burner' project for now.

But it IS sitting there, simmering. So don't think I don't appreciate the offer of assistance, and any ideas you, Thod, or anyone ELSE may pop out with in the meantime.

And Stefan, Jeff; if YOU TWO come up with something in the meantime, you may rely upon my discretion to DROP the mine trains FAST! You guys should know by now that when DF makes something, I STOP! I will NEVER step on your copyrights, as long as DF is actively designing or making an item, I will not - at least, not knowing, and if it turns out I accidentally duplicate something you're doing, well, as with the 6" Sci-Fi wall, I STOP - besides, yours looked SO MUCH better than mine did anyway!

Jim
