

Shopping cart security?

Posted by Freezerclown - 2010/04/15 03:06

I tried using the shopping cart a few days ago and there was no security icon. Now the icon appears, but I get a warning from my browser that the page is only partly secured. I updated my browser to Firefox 3.6.3 and still got the warning. Also tried Google Chrome. I'd really like to purchase some products through the website, but don't feel comfortable using the online store without a fully secured interface.

I just placed an order. I also did not see a security icon. I am using latest Firefox as well. But I did not get a security warning.

Would like some feedback on if this is fixed.

Just wanted to let people know that the DF site is fine with security. In the latest version of firefox, you have to click on the site icon next to the arrows in the upper left. That will give you more info on the page you are on, including if its encryped.
