Dwarven Forge - Dwarven Forge Generated: 9 December, 2013, 14:50 Labyrinth Set Posted by jackattack - 2010/05/20 20:37 This isn't so much a new idea, as it is an idea to package existing pieces together. How about a set featuring: 1 "X" intersection 2 "T" intersections 4 "L" intersections 8 2" passages 3 6" passages 2 curved passages 2 passage end caps 1 "cave-in" end cap This packaging would allow builders to create mazes and complex tunnel systems without buying lots of other pieces they might not want. True labyrinths would be a couple-few sets away. Is this something folks would buy? Any suggestions for other pieces, or different numbers of existing pieces?

I love this idea! I would buy a few of these in a heartbeat.

Narrow passage sets are great for making labyrinths
