I will try to make a video of each set up I play here.

Here's the first one without minis since I just wanted people imagine their own monsters and villagers into this set up.

Is that the new Wooden House set at 1:52?!? And again at 4:40??

Thanks for the video in any case! That's great! I like the roofs that you have going, and especially the 2 story caverns at 4:00.

I think you're talking about the Morgar's grange set. (psomminiatures)

It's not the woodland set since I wait for the comparison of the 2 prices bewteen DF USA or THOD to know which way to choose.

(Each cent counts now above 150€ of pricing)

Ghost, here's a seller of the mats you're looking for: HOTZMATS

They have several sizes to choose from and can print double sided.
