Problem staying logged in on iPad Posted by richens - 2012/03/17 00:58
Hi,
I'm having trouble with the "Remember Me" button when I'm logging in to the forums on my iPad (and iPhone too). No matter what I try, I can't get the check mark to appear in the box so I have to put in my user name and password every time. Has anyone figured out how to get this to work?
Thanks, Bob

It has been happening to me for quite a while and I'm running win 7 pro.

Me too, on iPad 1 and my Mac running Safari.
Even when the box is checked, it doesn't remember me
Re:Problem staying logged in on iPad Posted by Pusherman - 2012/03/17 13:28
Same here, ive never been able to check the 'remember me' button while using my ipad. Also it keeps logging me off while using my computer too (running vista).

Dwarven Forge - Dwarven Forge Generated: 27 January, 2015, 17:05 Not every website is compatible with every web browser. Let alone mobile browsers. Re:Problem staying logged in on iPad Posted by jackattack - 2012/03/17 13:52 This is a recent development. On the same systems, I was logged in for over a year with no problems. Re:Problem staying logged in on iPad Posted by richens - 2012/03/17 15:59 What's weird is that I *was* logged in on my iPad but I logged out to check something, but then when I tried to log back in, that "Remember Me" button just wouldn't work. I wish I could remember how I logged in before..... Re:Problem staying logged in on iPad Posted by thebigteacher - 2012/03/17 16:00 jackattack, Same goes for me. Logged on for months and months and now it will not even hold for 20 minutes. Re:Problem staying logged in on iPad Posted by dndgamer - 2012/03/18 02:33

It's been that way for me, too, and I've been using IE for a long time but for about 3 months now the problem has been the same...got to keep logging in and the website does not remember me!

I'm just gonna have to stop visiting this website!;)

Jeff/Stefan
Any chance this issue can be addressed? Lately I seem to use my iPad more than my computer.
Thanks!
Re:Problem staying logged in on iPad Posted by jackattack - 2012/04/03 21:29
Well, my Mac is staying logged in (or logging in automatically), but now I don't get red folders or "new thread/new post" info on the web page.
Nothing changed on my end. Maybe it's my ISP?
Re:Problem staying logged in on iPad Posted by Arcarius2001 - 2012/04/04 01:10
It doesn't "remember me" for my iPad either. Used to work just fine.
