Hello Jeff & Stefan !

I've opened a website (not known yet & still in construction) about dungeon crawl boardgames.  
I've noticed you have mainly limited the use of your products for D&D minis & roleplaying games so a lot of french people don't know your line but are playing to games in which you can use DF.

Into a special page, I will list all scenery shops with their authorization so I would like to know if you're agreed with a page listing all your products from the first to the last.

Here it is : <http://www.lessouterrainsoublies.fr/dwarvenforge.html>

It use your logo and set images.

If you're not agreed please let me know and I will delete it.

To Stefan : take a look on the ice cavern : I succeeded in giving the effect you wanted for this set ...
