My group finished the Paizo module Hook Mountain Massacre. Here are a few shots of my set-up.

Thanks! Yes I love those boats. I never would have found them if you hadn't brought them up.

Sorn,

I think I remember myself asking you where you got your own boats from, those you used in your Super cool Gigantic City setup. Can you tell us? Regarding the Shifting Lands boats, you might want to visit and read this or this.

I know from your posts that you don't have time/interest to paint your stuff and you seem to have an unlimited budget compared to use mere mortals. Gerard Boon (the sole owner of Shifting Lands which is more a hobby project than a company) might want to paint the boats for you if you ask him nicely and send him a link to your setups!

@Kronos: I have been trying to use your tips to snag better pics. I can definitely see the difference after using your advice - thanks again for that!
