

Request for half-floors and others...

Posted by biowizard - 2013/04/11 08:57

I'm trying my best to promote the Game Tiles Set kickstarter. Weirdly enough, I won't buy any set for myself (\$1 symbolic backer only) as I have way too many basic Polystone classic pieces already. The new diagonal and curved walls add-ons now available for the kickstarter have me remembering that I still would like to buy half-floors for diagonal and curved walls for the classical Polystone line.

Is there any interest for those other than me here?

Can we get a diagonal walls & matching half-floors (those ever done had ugly bow-ties in them) classical Polystone set or kit?

Can we get a curved walls & matching half-floors (I don't think those were ever done for the classical line) classical Polystone set or kit?

As I'm requesting pieces, I'm re-iterating my interest in a wide-angle bigger curved wall just like the ones magnificently assembled by Rodenbach here. His idea of such a piece "missing" a 2*2 floor piece is fantastic for increased versatility.

Availability of half floors for diagonals and curved walls would be nice. And a large angle curved wall to allow for making a large circular room would be great.

And here:

<http://www.dwarvenforge.com/forum?func=view&catid=3&id=36895>

The curved pieces have the advantages of sticking to the standard floor grid, and being designed to work with or without a standard Straight Wall piece between them.
