Questions About the Diagonal / Curved	Sets
Posted by dartagnan4 - 2013/04/15 06:20	

I have pledged at the 10 set level and have a couple quick questions about the add on sets

- 1. Are we limited to 2 set maximum for each of these add ons?
- 2. do I have to increase my plede to cover this before the end of the kickstarter or will I be allowed to do this after it ends?

thanks

Re:Questions About the Diagonal / Curved Sets Posted by cybrsage - 2013/04/15 14:16

I am a little confused - which surprises no one, especially my wife. :)

We went with the 5 set pack and have happily seen more and more items be added to it as the funding increased but I am a bit confused about the curved and angled pieces.

Do we get some with the original funding or do we have to buy them as an add on item in order to get them? In other words, do I get 10 of each (with the ability to add on more if I desire) or none but can buy them at the great pricing offered now if I want them?

Re:Questions About the Diagonal / Curved Sets Posted by biowizard - 2013/04/15 18:13

dartagnan4,

You can buy as many add-ons as you like.

Yes, you need to increase your pledge before the end of the kickstarter. Otherwise, you won't qualify for free shipping in the US, you might not be able to buy these add-ons later at the same low price and your total pledged money would not count to unlock new stretch goals.

cybrsage,

Each set you buy (two and more) qualifies you to obtain freebies, including a few diagonal and curved walls (nice explanatory image). For now, you obtain 2 diagonal walls per Set (10 for you since you are buying 5) and 2 curved corner wall per set (10 for you since you are buying 5). Furthermore, you are also allowed to overpledge more money to obtain even more Curved Corner Packs and/or Diagonal Wall

Packs. So, if you want more curved corner and/or diagonal walls, click "manage your pledge" at the top right of the KS page and manually increase the amount of money you want to commit (including possible international shipping fees). At the end of the KS, DF will contact you to know your shipping address and to know toward which product your overpledged money should go to. Finally, any "combos" for add-ons are possible, with any present or future add-ons. This means that you can buy 1 diagonal wall pack and 1 curved corner pack for \$70 (unpainted) or \$95 (painted).

(painted)

I did not know that about the Diagonal/Curved Combo option, that's good news.
This is turning into kind of an expensive Spring for me, between two kickstarters and Mega Miniatures
Re:Questions About the Diagonal / Curved Sets Posted by Stefan - 2013/04/15 20:16 Thanks for helping out guys! especially BioWizard!
