Roleplaying Maps Posted by swcorwyn - 2013/07/10 01:15 A kickstarter just launched for some roleplaying maps, various layouts and types that will match up in different layouts, you can request hexes, squares, or no grid if you have an overlay. Only \$20 to get 12 maps, or \$40 gets you over 30 maps. Their initial goal is really low, so who knows how many could be added. http://www.kickstarter.com/projects/1534484023/roleplaying-maps-by-arcknight Re:Roleplaying Maps Posted by dafrca - 2013/07/10 09:10 I also like that they offer Grid, Hex, or no markings on the maps. Allows folks to fit the maps to their normal useage. Re:Roleplaying Maps Posted by KacyCrawford - 2013/07/10 10:46 Cool! Re:Roleplaying Maps Posted by Crimson_King_of_the_Tower - 2013/07/10 12:04 that really is interesting i MIGHT get it but since the DF KS ive been devoting ALOT of time to making 3d terrain. Sorta making 1x1' sections of forest and swamp and the like for occasions where there are battles that meet the terrain needs things like that, but still its really cool. Re:Roleplaying Maps Posted by dandare - 2013/07/10 16:51

FYI - an already established range available from Paizo:

Dwarven Forge - Dwarven Forge Generated: 19 April, 2014, 01:39

1/2

Dwarven Forge - Dwarven Forge

Generated: 19 April, 2014, 01:39

http://paizo.com/gameMastery/maps/campaignMapPacks

I have a few of their pre-printed card stock sets. (A large wooden warehouse & A set of large boats.) They are good quality, laminated feel card stock. But only have square grid.

(I have no idea how the PDF 'download options' are.)

Dundjinni is my go-to for this kind of thing. Can make my own - or use TONS of fan based material - and make the map i exactly want. Print it out card stock, or, even better, print on paper, cut out, and glue down on foam core!!!

Didnt even know that existed... Might have to pick that up too. Im backing this project because the buy in is low, its a small business, and It looks like it might blow up. Plus, then the maps are already printed and ready to use, as opposed to having to print them myself.
